

## **STOP WORK POLICY**

In line with our HSE Policy where our objectives are clearly defined, it is the right of any company's employee to stop the work when there is a potential of an immediate threat to the safety and health to themselves and as well as others who may be affected by the company business operation.

Should any such circumstances arise, the work should be stopped immediately and the person involve shall immediately inform or seek advice from his superior or the worksite designated person in charge for an appropriate response.

There shouldn't be any doubt for all the employees to act so as the management is fully agreed and committed with this policy in protecting the employees on site, comply with all rules and regulations and keeping the good images of the company.
